**What you get with SPIKYJUMPER©:** My style is that of candid-reportage story-telling of the day and I frequently shoot over 800 images at a wedding. After editing, typically you will get 300 of those included in your online proofing gallery and on the CD I include in The Cashmere. On this disc I will provide high resolution versions in colour, black & white and 'treated' (usually a mixture of retro, sepia and antique treatments of the photos), so three folders on the CD. In contrast the online proofing gallery will display all images in full colour as they come out of my camera, but options to view and then order in black & white and sepia are available.

I'm very amicable, discrete, polite, low-key, laid back and confident when I work. I'm not a bombastic directorial photographer who arranges people and organises quirky posed shots and massive, neat group photos are not my speciality either. Note you don't see any in my portfolio. I do however think all couples should have at least some groups shots, mainly for granny or mum, so I offer a maximum of eight on the day. Please confirm you are happy with this.

*\*It may well be possible to include more photos depending on layout, together with you I will design all layouts and proof you via email. Album upgrade options are available on request. Please note there is a big difference in appearance between the photo book and the wedding album. Where possible I will try to show you examples, please ask.*

*\*\*If ordering the Cashmere, a deposit of £300 is required.*
